SEED GROWERS

PHILADELPHIA

Best Seeds that Grow for 1919

Tested and Proved at Fordhook Farms

FORDHOOK FARMS are famous the world over as America's largest and most complete Trial Grounds. At FORDHOOK everything sold by the House of Burpee is tested twice each year. First, every lot of seed is given a thorough vitality test in the actual soil. This work is carried on in the greenhouses during the winter months before any of the seed goes out to our patrons. Then during the summer we make a complete duplication of all tests in the open Trial Grounds. It is in the open, of course, that we prove the quality of the products raised from Burpee's Seeds.

Our entire effort is devoted to production and distributing seeds and only seeds of the best quality. We try to do this one thing just as well as is possible.

We will be pleased to have your order for seeds and we assure you that we can serve you well. As of all other merchandise, the prices of seeds are governed by the cost of production and the law of supply and demand. This law particularly affects such crops as are short, and prices on these, of course, have advanced.

While Burpee Seeds cost more to produce than do seeds of ordinary quality, the prices have not been advanced to more than is usually charged for Pedigree Seeds. With the return of peace the demand is bound to be very heavy, and early orders will, of course, have preference. We will be glad to quote special prices on large quantities at any time. Your inquiries will have prompt and careful attention.

Seeds by Mail The prices in this **MARKET GARDENERS' PRICE LIST** do not include the cost of transportation, except on **Seeds in Packets**. The purchaser pays freight or express charges upon receipt. **If Seeds are ordered by mail**, the cost of postage (Parcel Post rates) must be sent with the order. The Parcel Post rates are regulated according to distance, and the purchaser can readily ascertain the postage by referring the matter to his postmaster.

Seeds by Freight and Express Where it is convenient to use express service we recommend it as economical, and in addition you are assured of prompt delivery. Where very large quantities are to be forwarded, or the distances are short and time is not a factor (freight service is now greatly congested), freight charges are lower than express. **It is our desire to give our customers the benefit of any method of transportation that may be the most economical for them.** Should you be in doubt as to the best method, we would suggest that you leave this to us, as we can then serve you as our wide shipping experience warrants.

Our Terms are **Cash with the Order**, unless you are personally known to us, or in a business where we can learn your financial standing from the ratings of the commercial agencies. Our prices are fixed **close to cost**, hence we must maintain our rule of "cash with the order" or **C. O. D. by express**, as explained below, excepting only in the cases named, when we shall expect remittance within thirty days.

C. O. D. Shipments can be made by express (not by freight) when \$2.00 is remitted with the order to cover express charges in case the shipment should not be paid for upon arrival.

You Run No Risk in sending cash with order. Our reputation as honest and experienced seedsmen is well known, while our financial responsibility can be learned from any bank, trust company, or merchant who subscribes to either of the Commercial Agency Reports. **We make no charge for bags or boxes.**

How to Order Please be careful to sign your name, post office, county, and State on each and every letter sent us. You may remit at our risk by post-office money order, check, draft, express order, cash or stamps by registered letter.

33⅓ Per Cent. Discount on Packets

After making out your order, figure up the total value of **Seeds in Retail Packets**, at the prices quoted "per packet," and then **deduct one-third**. Prices by the trade packet, fraction of ounce or pound, are net.

Burpee Quality Vegetable Seed

Wholesale Prices for Market Gardeners and Farmers' Clubs

This List Cancels All Previous Quotations

THE position occupied by the seedsman who undertakes to supply seed to the market grower is one of great trust. Surely his service is one based on confidence.

CONFIDENCE makes possible the commerce of the world. It is the greatest factor that enters into a purchase of seeds, because you are not buying a finished product but only the means by which your garden will be either a pronounced success or a partial failure. Seeds—good or bad—may look the same, but how different their resulting crops! You cannot afford to risk a season's work with seeds of unknown quality.

When you buy BURPEE'S SEEDS the element of doubt is removed so far as is possible by human care. The confidence of many thousands of pleased and permanent customers is maintained by the Burpee Idea of Quality First—"to give rather than to get all that is possible." This confidence on the part of our customers, combined with the efficient Burpee-Service, has built the world's greatest mail-order seed business.

A careful examination of this "Blue List" should convince you of the excellence of our pedigree strains for market growers, and then a trial order—if you are not already a Burpee customer—will prove that your confidence has not been misplaced.

Burpee's Blue List for 1919 is reduced to a strictly business catalog. We have not attempted to give more than a line of description on such varieties as need it, and we suggest that if you are in any way unfamiliar with the varieties listed you consult BURPEE'S ANNUAL for 1919, our Retail Catalog, which contains full descriptive detailed information as to varieties.

Burpee's New Early- or Winter-Flowering Spencer Sweet Peas

From sowings made under glass in August, they may be flowered in time for Thanksgiving. September sowings will produce the finest of flowers by Christmas. If grown in the open, they flower several weeks ahead of the Standard or Summer-Flowering Spencers, and, with proper treatment, continue to bloom quite as long as that type.

Sown in Florida, California, and other Southern States toward the end of September, they will bloom from Christmas until April or May. Moreover, they are just the type of Sweet Pea for Japan, Australia, New Zealand, and similar climates, where they bloom and flourish during the cool months of winter and early spring, and until the weather becomes too intensely hot.

- 3392 Burpee's Improved Snowstorm** The result of a cross made between King White and Yarrowa, it embodies the best qualities of those two varieties and easily eclipses all early-flowering white Sweet Peas to date. The flowers are of Yarrowa size, but finer form, as the standard does not reflex but is magnificently bold, though charmingly waved. A vigorous grower, the immense flowers are invariably borne in fours on very long stems. This is the last word in White Sweet Peas. Pkt. 15 cts.; ½ oz. \$1.00; oz. \$1.75; ¼ lb. \$5.25.

- 3398 Yarrowa** The flowers average two and one-half inches in diameter; many are duplex or double. The color is a bright rose-pink with a clear, creamy base. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 70 cts.; ¼ lb. \$2.10; lb. \$7.00.

- 3400 Burpee's Sunrise Mixture of Early-Flowering Spencers** is probably the only mixture of Early-flowering Spencers offered at this time. It is a carefully composed blend of the finest of the many named varieties of Early-flowering Spencers. The seed has all been grown on our own Floradale Farm and is the best that is possible to grow. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 65 cts.; ¼ lb. \$1.95; lb. \$6.50.

Growing Early- or Winter-Flowering Sweet Peas in the Open

The winter-flowering varieties offered, in addition to their usefulness for growing under glass, will be found of great value for outdoor culture. In fact, in localities where, on account of extreme heat, the summer-flowering Sweet Peas did not succeed, or at best gave only a few flowers ere the vines died off, this new type can be grown to perfection.
